

Max Anabol

Anabolic Maximizer

Muscle & Libido Formula[†]

MMSN brings you a totally unique product designed to boost natural testosterone while blocking unwanted estrogen and increasing endurance and sexual performance. No other formula has minerals, herbs, and nutrients combined in precise ratios for maximum effect. Testosterone is the holy grail of hormones in the human body responsible for building muscle, stimulating libido, and enhancing athletic performance. **Max Anabol** delivers three potent proprietary blends for male enhancement.

The **Max Anabol** Male Performance Blend contains *Ajuga turkestanica* with active Turkesterones and Horny Goat Weed (*Epimedium grandiflorum*) for a boost to your male libido and hormones, *Rhodiola rosea* (3% rosavin) and Maca Extract (*Lepidium meyenii*) for improved endurance and stamina, *Pygeum africanum* (12% phytosterols) and Saw palmetto berry extract to support healthy prostate function.

The **Max Anabol** Anabolic Blend contains Zinc and Magnesium two minerals necessary for Testosterone production. Tribulus terrestris (40mg Protodioscin & 60% Saponins) supports the production of normal Luteinizing Hormone. Luteinizing Hormone (LH) directs the male testes to produce testosterone. By stimulating the production of LH, **Max Anabol** helps your body maximize its production of testosterone naturally, without any prohormones. Rhaponticum carthamoides delivers 20-HydroxyBetaecdysterone, a potent protein partitioning agent and muscle supporting compound that supports the body's ability to utilize protein for muscle. Muira Puama (*Ptychopetalum olacoides*) is known as an aphrodisiac. 5-Methyl-7-Methoxy Isoflavone is revered as a flavone that can support protein synthesis and reduce cortisol levels from normal stress. Stress, lack of sleep, aging, and a poor diet negatively affect your testosterone production. Long Jack (*Eurycoma longifolia jack*) has been shown to support sexual activity in aging mice. Together this anabolic blend is unparalleled in its completeness.

The **Max Anabol** Anti-Estrogen Blend contains three ingredients all aimed at decreasing the conversion of testosterone to estrogen and the effects of estrogen at the receptor sites. Red clover extract (*Trifolium pratense*), DIM (diindolymethane) and Chrysin all play vital roles in the management of estrogen.

This formula is unlike any other on the market. Only Max Muscle has it, and only Max Muscle sells it. Support your workouts and your results with **Max Anabol** the Anabolic Maximizer, exclusively available at Max Muscle Sports Nutrition![†]

Size: 90 Capsules
Serving Size: 3 Capsules
Servings Per Container: 30

KEY FEATURES

- Muscle & Strength Support[†]
- Endurance & Sex Drive[†]
- Naturally Hormone Free[†]

KEY MESSAGES

- Zinc and Magnesium are important in testosterone production[†]
- Male Performance Blend enhances energy, stamina, libido, and performance[†]
- Anabolic Blend uses the latest ingredients to support the anabolic processes of the body including testosterone production, anti-catabolism, and hormone support[†]
- Anti-Estrogen blend to maximize testosterone and minimize estrogen effects[†]

TARGET MARKET

Primary: Bodybuilders and athletes seeking to maximize muscle size and strength, testosterone production and minimize estrogen.
