

Max Kre-Alkalyn

Lean Muscle Support[†]

Revolutionary Delivery System![†]

MMSN brings you **Max Kre-Alkalyn[®]**, the next step in cellular volumization through a totally unique creatine delivery system. The patented **Max Kre-Alkalyn[®]** formula is buffered to create a new and revolutionary creatine that prevents the conversion to creatinine before reaching muscle. In certain environments creatine may convert to ineffective creatine reducing its benefits. **Max Kre-Alkalyn[®]** makes more high quality creatine available to the body which can mean better results in the gym and in the mirror. The patented delivery system intensifies the effectiveness of **Max Kre-Alkalyn[®]** allowing you to get great results while minimizing dosage and therefore the creatine related side effects of bloating or digestive problems experienced by some creatine users. Of course the delivery system also makes **Max Kre-Alkalyn[®]** a superior muscle cell volumizer and performance enhancer.

On top of the creatine related benefits, the patented process used to make **Max Kre-Alkalyn[®]** also allows you to exercise more intensely by protecting your muscles from excessive lactic acid build up during hard training. The special buffered system counteracts lactic acid in your muscles allowing them to work harder and longer. More intense regular training sessions means better results.

Creatine is still one of the most purchased products in the supplement market today and now **Max Kre-Alkalyn[®]** has raised the bar by producing a powerful muscle buffering, cell volumizing creatine delivery system.[†]

Max Kre-Alkalyn[®] is a registered trademark of Bioceutical Research & Development Laboratory

Max Kre-Alkalyn[®] is a patented product (Patent # 6,399,611) registered to Bioceutical Research & Development Laboratory.

Size: 120 Capsules
Serving Size: Two (2) Capsules
Servings Per Container: 60

KEY FEATURES

- Increase Strength & Endurance[†]
- No Loading or Bloating[†]
- Buffers Lactic Acid[†]

KEY MESSAGES

- Buffers muscle lactic acid for longer and hard training sessions[†]
- Won't convert to ineffective creatinine so more creatine gets into the body[†]
- Patented revolutionary delivery system for no bloating or digestive problems[†]
- Supports muscle recovery and growth[†]

TARGET MARKET

Primary: Men and women wanting to increase lean muscle mass and improve appearance.

Secondary: Those who have problems digesting regular creatine supplements.
