

ThermX

Extreme Series Thermogenic Catalyst[†]

NOTE: READ ENTIRE LABEL PRIOR TO USE

ThermX by Max Muscle Sports Nutrition is a revolutionary, new cutting edge fat burner that raises the diet & weight loss category to a higher level. This unique formula contains 5 different proprietary blends within one product to support fat loss, thermogenic activity, appetite management, water loss and extreme energy.

The Essential Blend contains three ingredients to ignite your fire. Citrus aurantium is an herb that can enhance energy levels. Octopamine HCl is an ingredient that targets beta-receptors at the cellular level to support metabolism and thermogenesis. Cordyceps supports stamina and vitality as well as lung function.

The Energy Blend contains Guarana and Yerba mate as natural sources of caffeine along with theobromine another methyl-xanthine for quick energy and alertness. Green Tea Extract contains anti-oxidants along with EGCG for sustained energy and metabolism. Panax ginseng is known as an energy-balancing herb for vitality and energy.

The Water Loss Blend contains a combination of herbs designed to support water loss. Unwanted water just beneath the skin can hide muscle definition. This unique blend of Dandelion Root, Uva-Ursi, Juniper Berry Extract, and Buchu Extract works synergistically to remove unwanted water and bloating from your body naturally. Be sure you drink plenty of water because it also acts as a potent diuretic.

The Thermogenic Blend of ginger root and cayenne pepper will keep you warm. By generating heat within the body you support your metabolic rate. By getting warmer and even sweating you are using calories.

The Synergistic Blend is composed of ingredients that support the rest of the **ThermX** formula. L-Tyrosine is a precursor to epinephrine and norepinephrine, potent metabolic stimulants produced by the body during intense exercise. Bioperine is a compound that can assist in the absorption of nutrients found in **ThermX**. Diiodo-L-Tyrosine supports thyroid function. The thyroid is responsible for controlling the metabolic rate. Taurine is a non-essential amino acid that acts like an anti-oxidant.

The MMSN proprietary blends have been formulated to contain quality ingredients that work synergistically with each other for accelerated results. As with all MMSN products, we use only the highest quality ingredients to maximize your potential for extreme results. No other formula available today delivers anything close to **ThermX!** For best results, combine **ThermX** or **ThermXX** with **ThyrX**, **SuppreX**, **EnerX** and/or **DiurX**, regular exercise and a controlled diet plan.[†]

Consult a physician before starting any diet or exercise program.

Contains 215mg of Caffeine per serving (two capsules).

Size: 120 Capsules
Serving Size: Two (2) Capsules
Servings Per Container: 60

KEY FEATURES

- Thermogenic Catalyst[†]
- Increased Energy Levels[†]
- Appetite and Weight Management[†]
- Water Loss[†]
